Unusual Cat Turns Into a Superhero

New York, NY - April, 12 2006 -

You are sitting on your bed crying because you couldn't go to the prom. You have a black cat sitting on a chair next to your bed looking up at you. You put your head down on the bed for one minute and see a flash of light. You look up and there in front of you stands a tall, dark man wearing a black cape. It's Byron the Superhero come to save your day.

Far-fetched? Not with Hollis and Byron. You'll find this to be true when you read *Byron Unleashed*, *Byron Unleashed* takes you into the life of Hollis Billingsworth, a rambunctious teenage girl, who adopts what appears to be a normal black cat, until she later discovers the black cat not only is different (the cat has seven toes), but he also has magical powers.

"*Byron Unleashed* is one book that towers above them all. It really keeps you turning pages. My friend's child didn't want to stop reading it. The book has a great flow from cover to cover and the illustrations are fabulous," said Sandra Jordan, New York City's famous psychic and owner of Art By Design.

"It is so exciting to see the look on each child's face as he or she is captivated by each turn of the page. We have even had feedback from adults who bought the book for their children and read it themselves," said Harry Husted, Owner of Creating Words, a writing service, and co-author of *Byron Unleashed*.

"We are so happy to see people buying the book for their children and enjoy reading it. So far we've had many people buy the book and claim they couldn't put it down. Their kids loved it," said Gerry Hoylie, owner of Allana Enterprises, and co-author of the book "*Byron Unleashed*." Gerry continued, "We wanted to provide something for the Harry Potter generation. Something so unique that hasn't been seen before. Something that children can read and have a superhero they can look up to like Superman."

It's definitely one book you can put next to your Harry Potter collection.

If you want your child to be captivated beyond reason and have a superhero to look up to who looks just like us, this book will do it. This book gives the term superhero a new twist.

About Allana Enterprises

Allana Enterprises is an solely owned and operated entertainment company by Geraldine Hoylie, otherwise known as "The Hollywood Caricaturist." It's main products and services include caricatures, psychic readings, impersonations, and more.

About Geraldine Hoylie

Besides being a businesswoman, Gerry is also an artist, creative genius, and all-around "funny

girl" to everyone. She constantly comes up with new ideas for book material.
