

*If you play the lottery and find yourself losing, let an ACTUAL LOTTERY RETAILER show you how you can win every lottery including the Pick 3, Pick 4, Pick 5, Pick 6, and Scratch off, in five minutes or less!*

## **“Actual Lottery Retailer Reveals Secret Method to Beating the Odds and Winning Every Kind of Lottery Practically Overnight!”**

**Now You Can Use This Secret Method and Give Yourself an Advantage Over Other Lottery Players While Filling Your Pockets With Lots of Cash!**

Dear Lottery Player:

How many times have you gone to the convenience store and bought a lottery ticket, only to find out you didn't win. You were disappointed, right?

**Sad feeling isn't it.**

Why did you want to play the lottery even though you knew you may lose? Maybe it is:

- To have bragging rights for winning
- Being able to buy a house
- Being able to buy a better car
- A dream to hit a big winning ticket like 25K or more.
- Just to have a better way of life
- To pay some of the bills.
- To have nice things

Maybe you spent your last dollar on the ticket when you could have spent that on a cup of coffee.

What is worse is that you have friends who are constantly winning the lottery. Why are they winning but you can't?

Wouldn't it be good to win one time so you can feel like a winner? Think about having bragging rights because you won.

I've noticed so many people like you, going after the lottery, but time after time they didn't win. In fact, I personally saw 99% of lottery players who were playing the WRONG WAY.

You may have bought books in the bookstore or online to teach you about winning the lottery, but found they didn't do anything for you.

So you need not...

### **Blame Yourself For Your Misfortune!**

Do you know what is even more discouraging? Those books were written by someone who didn't have a clue how to play the lottery correctly.

Most of the text is plain theory that wasn't even tested.

When I see what people are doing to play the lottery it gets me very frustrated, since they don't have any idea that they are using the wrong strategies.

I can say this because at one time I was also doing the same thing. I often failed at the lottery. I kept wondering why I was failing.

However, one day I saw the light and I found a way to beat the system and win at the lottery. I worked hard to produce and perfect a method to better my odds, and when I was done, I noticed an increase in the number of times I won the lottery.

Now, I want to help you, by giving you the chance to...

### ***Beat the odds and win every lottery...***

When I first started playing the lottery, I didn't know what I was doing. I kept playing the lottery but failed.

But since I worked in a convenience store that sold lottery tickets, I was referred to as a lottery retailer. Being one, I had access to lottery agents as well as winners of the lottery tickets.

When I would see the agents and winners, I interviewed them. I wanted to know the secret way to winning the lottery.

After many months of interviewing, research, and trial and error, I finally came up with a secret method that will help anyone better his or her odds at winning the lottery.

Now I can make this secret method available to you.

## **So Listen Up For Today You Are Going to Discover The Truth About Lotteries!**

You probably are thinking right now why you should listen to me about playing the lottery?

If you have heard of me, you know I do not give BS to anyone. When I make a claim, I mean it. And when I say you can better your chances at winning the lottery, you can believe it.

But if you have not heard from me, let me introduce myself....

My name is B. J. Min.

For five years I worked in a convenience store as a lottery retailer. I sold over a million dollars in winning lottery tickets. I saw how people lost and won. I tried to play it myself but also lost. I began interviewing lottery agents, lottery players, and lottery retailers.

Through the next few months, I got hold of many lottery systems and studied them. What I found was staggering:

- Lack of a system for reducing the amount of numbers played
- The games were too complicated, or hard to play, and didn't produce required results
- A system that did not calculate the right numbers
- The odds were too high
- They missed picking the right numbers to play 70% of the time.
- Keeping up with all the numbers was hard
- Some lottery systems were difficult to follow, too lengthy, and tended to repeat the same info over and over again
- Lottery systems were outdated because the lottery changes with adding more numbers to make it harder to win, and there were a lack of instructions.

I figured I couldn't depend on what was out there, so I decided to do my own research.

I did get to learn many secrets of how to improve my chances at winning the lottery. I soon put together a winning strategy that provided me a way to beat the system.

While completing my methods, I would witness others picking any random number or playing quick picks instead of picking their own most likely to hit number (based on doing a simple study of the previous numbers used in the past).

It was because of this failure by others that I quickly developed and completed my own secret method to winning the lottery. As such, I became the ONLY lottery retailer to create an insider's point of view to winning in all the lotto games.

And now I am making this available to the general public.

What is it?

What you read above is just a taste of

what you will get when you order *Lottery Method*. There is just so much more to say it would take pages to write.

I promise you this type of product can be found nowhere else whether it is in a store or online.

Since introducing *Lottery Method* to the general public, I have received countless emails from my customers, thanking me for producing such an astonishing and proven system that actually works.

Read what some of my customers had to say:

Hi BJ,

Congratulations! I read your book over the weekend and was most impressed. I have refused recommendations for other lotto courses in the past, either because a) They made unrealistic promises, or b) The content was very poor.

I have a strong focus on telling people there is no magic bullet, just ways to improve their odds; that they will lose more often than they win; and that they should only play with money they can afford to lose.

Yours is the first book I have reviewed that is equally strong in this area. **Your content is excellent, well presented and makes good sense.**

It will be a pleasure to recommend your lottery course my friend.
