Internet Marketers: If you want to see a 25% increase in opt-in users and skyrocket your sales through the roof, keep reading for you will learn about a new way to gain exposure for yourself and your offer without programming experience!

"Discover a New Way to Increase Your Opt-ins by as Much as 25% and Watch Your Sales Skyrocket – Without doing any Programming!"

New Product Is Easy to Use and Installs In Seconds Without any Technical Knowledge!

From Thomas Breher

When you are cruising the Internet and you run into a website you want info from, don't you hate it when a popup occurs?

Even though you may have a popup blocker you still may end up getting them. What about hover ads? Some people just click the close button to get rid of them. Or they may misfire, and you end up with no hover ad.

Even if they do stay on your screen, you have to use your mouse to connect to the ad and type in what is required. This can be awkward to say the least.

I know, I have seen them as well. At first, I didn't like them, but in my marketing efforts, I found myself using them.

I really had no choice until I discovered the answer. What I discovered changed the way I did marketing.

When I applied my new discovery to my own website, I noticed my opt-in list grew tremendously.

A New Way of Marketing

If you think about it, your ad is supposed to gather the attention of people with the goal of selling something. You do have to connect with them in any way you can, but the ways to do it must prove beneficial.

Your ad is meant to draw customers not send them away. This is what was happening to me initially when I used popup and hover ads.

But when I used my recent discovery, I saw my opt-in list explode and my sales increase as much as 300% within three days.

What I discovered was a new way of marketing. This new way of marketing would end up becoming the cornerstone for me in getting people to join my list.

A Script to Produce Customizable Slide Up Ads

What I created was a script that creates customizable slide up ads. When I checked online to see if my invention was already done, I noticed someone else had created one like it, but theirs was way too slow.

I created one that was blazingly fast. In fact, here are attributes of what my script can do:

> - It is hard to find a solution for this type of advertising method
> - The script is lighting fast, competitor scripts are very slow
> - The contents of the slide up ad can be completely customized
> - Users can select from a wide range of different templates
> - Templates can be either customized or new ones can be created within minutes
> - No database is needed
> - The script created nice looking, beautifully, but unobtrusively, ads, shown at the bottom of the browser
> - The ads will not be blocked by popup-blockers

When I created the script, I made it so anyone without technical skills could customize to work with their website or any kind of website. There was a user-friendly system that made programming a breeze.

After I customized the script for my website and released it to work when people visited my web page, I tested it by going to my website and watched the Slide Up ad appear. It did just as I had programmed it to do.

The ad slides up on my screen quickly. I typed in some bogus data and clicked Subscribe. I received my test email in seconds.

Introducing My Newly Discovered Fast Customizable Slideup Ad Creator

Unlike other similar products like mine, this method is way above those in that it is fast and provides whatever data you want it to display.

In fact, here are some reasons my Slideup Ad Creator is superior to others:

- The script is easy to use even for the most technically challenged.
- Can be installed easily without the need of a database
- Can be used with many websites
- Unlimited instances of Slideup ads can be used on different pages

All you have to do is take my script, install it on your computer, run the program, customize it to display whatever data you want, save the settings, copy the code and paste on your web page near the bottom before the final </html> tag.

After you do this and upload your web page to your web host server, any time someone ends up on that page, an ad you created will slide up on the screen. It will appear to look like the web page itself.

The ad won't be a popup or a hover ad. Instead, the ad will slide up on the screen. This guarantees it stays there longer and gets noticed.
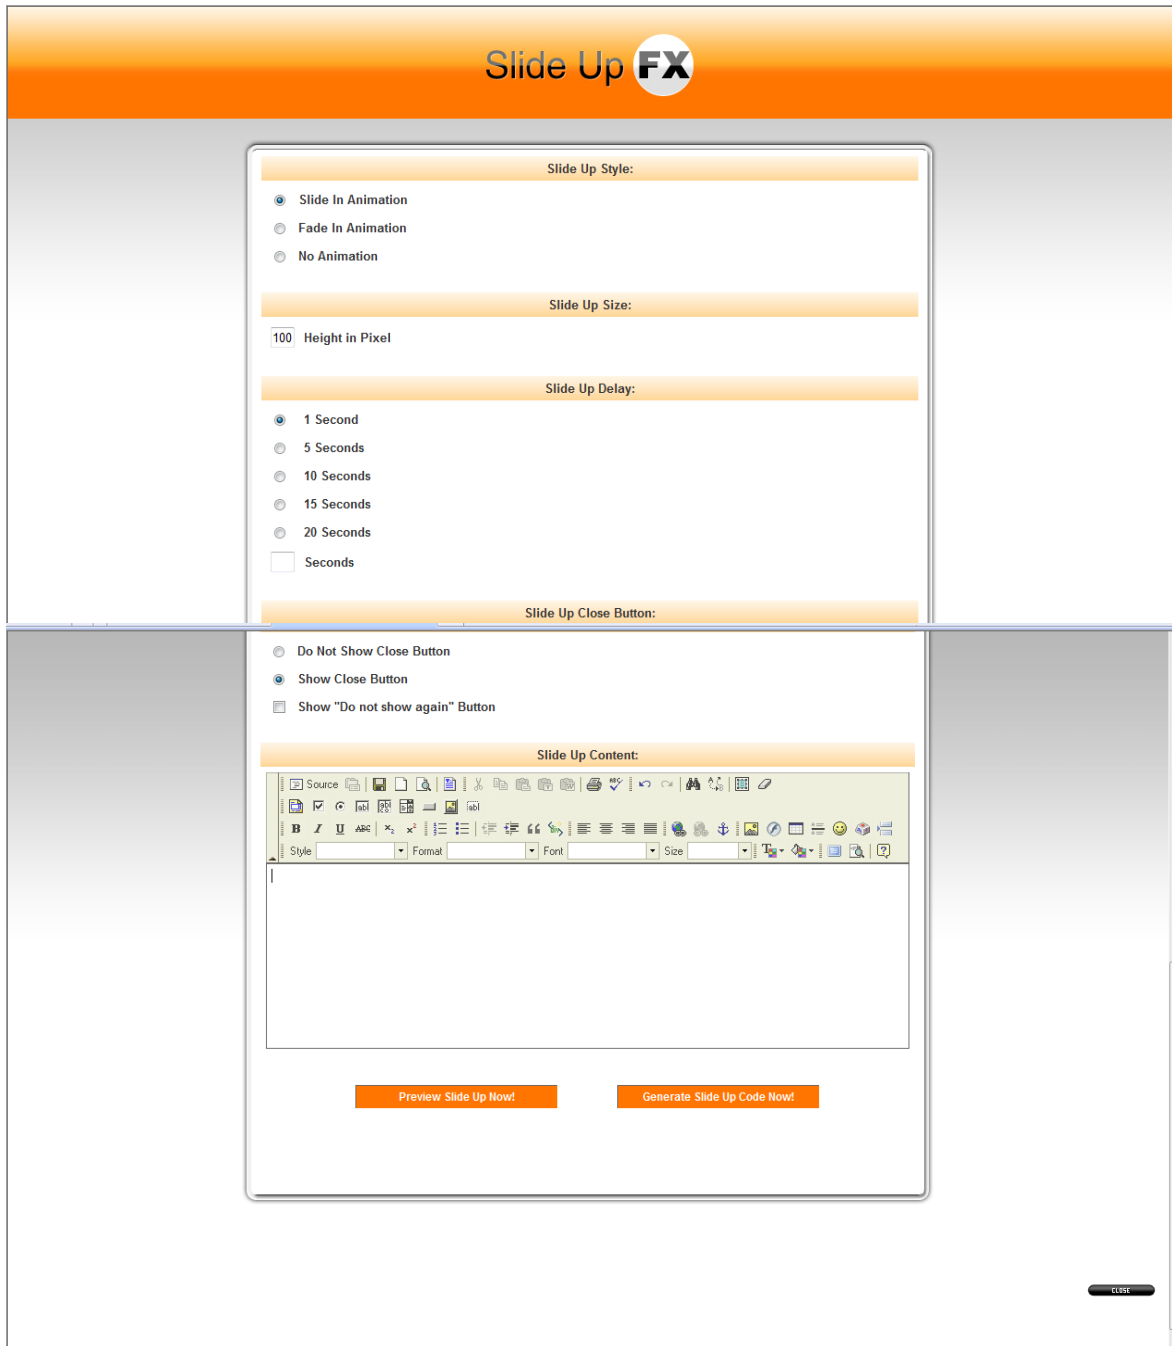

If your goal is to increase sales or just to increase your opt-in list, by placing my script on your web page, you will have done that and more.

The great part of the slide up ad is it is not a popup or hover ad. You can still close it if you don't like it there, but the ad will get more attention as it fills up the bottom of the screen.

Customizing Is the Heart of the Program

When you run the program, you will see an administration panel. With this panel you can have it do so many things.

Here is a screen shot of panel and the choices you have:

It is here you can decide how you want the slide up ad to look. You can choose between a slide in or fade in animation, or no animation.

You can decide how high you want your ad to appear when it slides up.

There is even a way to control the delay of the ad sliding up. You have the choice of whether to include a slide up close button or not.

Once you have made your choices, all you have to do is click the Preview button to see what the slide up ad will look like before you place it on your web page.

If you like what you see, just click the Generate Slide Up Code Now button and you will be given code that you can copy and paste into your web page, or pages.

The process is so easy that even someone without programming experience can do it.

If you are experiencing the issue of trying to market your product online, you would do well to use my script program. This way you won't have to worry about your customer closing your popup or hover ad.

Here is what some people had to say about it…

Insert testimonials here

The proof is in the pudding as someone once told me. If you want results, you'll get them, simply by using my script program.

The cost of my script is only (insert price here). It is kept low, so you can take advantage of the program. This way you can try it yourself.

Eventually, I will raise the price, so you need to take action now before the price does go up.

If the reason you are not taking action is because you are unsure about spending the money, don't forget that slide up ads don't get closed like hover or popup ads do. So, you stand a better chance of getting your product noticed.

However, despite this, you may still be skeptical or concerned, considering you never saw my product before. So, what I will do is issue you a promise.

I will remove all risk from you. This way you stand to lose nothing. How do you feel about that deal?

I will offer you the chance to try my product risk free for 30 days. If during that time, my product doesn't work well on your system, or you do not get the results you were looking for, simply contacting me for a full refund. No questions ask.

I believe is satisfying my customers above anything else and this is why I am offering this iron-clad, risk free, no obligation, 100% money-back guarantee.

What are you waiting for? Take advantage of my special incentive offer today, and double or triple your marketing efforts within hours after getting my program.

To your marketing success,

Thomas Breher
P.S. My script is guaranteed to double or triple your opt-in rate. It worked for me and it will work for you.

P.P.S. You can't beat the price considering the quality of the program and how easy it is to install and use.
